CONTINUOUS GAS FRYER

FGC150

This continuous fryer (also known as a frying line) is designed for high-volume, fully automatic food production. It is ideal for pre-fried products, French fries, croquettes, nuggets, *flamenquines*; pastry products such as churros, donuts, fritters, etc.; nuts; and even pasta.

TECHNICAL SPECIFICATIONS:

- **Gas Combustion System:** Operates with **natural gas (NG)**, **liquefied petroleum gas (LPG)**, or **diesel**, with a burner power of 38 kW, ensuring rapid heat recovery and uniform cooking.
- **Cooking Control:** Equipped with a **speed variator** that allows precise adjustment of cooking time, adapting to a wide variety of products and consistently delivering ideal cooking results.
- **Uniform Frying:** Ensures even frying or cooking with reduced oil absorption, thanks to a continuous **oil recirculation and filtration system**, which prolongs oil life and maintains optimal quality.
- **Materials:** Constructed from **AISI 304 stainless steel** for durability and easy cleaning; tank lined with **special insulation** to maximize thermal efficiency.
- **Filtration System:** Features a **recirculation pump** that directs used oil to the filtration tank, ensuring top-quality oil throughout the frying process.
- **Optional Features:** Integrated extraction hood. Double conveyor belt for full product immersion. Automatic tilting system, Teflon-coated belt, and automatic chain lifting system to increase operational capacity.
