MOTORISED ELECTRIC BASCULATING SARTEN WITH SCRAPER SBE100A

Round, conical pan designed for food preparation and discharge into carts via a motorized tilting system that maintains a constant height at the discharge opening. It features a double bottom containing thermal oil and an inner kettle that is easy to clean, equipped with a removable stirrer whose blades scrape along the walls to prevent food from sticking and to facilitate subsequent cleaning. Additionally, it has a double-sided construction with full thermal insulation coating, contributing to significant energy savings.
