## AUTOMATIC BREADER 320 mm

EAUT320

Ideal for the automatic battering and breading of a wide variety of products. It is designed to automatically apply liquid egg and breadcrumbs, making it perfect for the production of croquettes, meatballs, flamenquines, cachopos, turnovers, fillets, meats, bites, and steaks, among others. In addition, its versatility allows it to operate with sugar and other sweet ingredients for coating confectionery or dessert products.

### TECHNICAL CHARACTERISTICS:

- Manufactured in satin-finished AISI304 stainless steel.
- Reversing switch for automatic breadcrumb discharge (optional).
- Fully detachable design for easy cleaning.
- Variable speed control for different products.
- Tabletop machine (optional stand available).
- Option for special ramps and additional conveyor belts.
- Suitable for breading pieces with a maximum width of 160 mm.
- Constructed in compliance with CE standards.
- Standard detachable hoppers for coating and breading.
