

DATA SHEET

AUTOMATIC BREADER 440 mm

EAUT440

Ideal for the automatic battering and breading of a wide variety of products. It is designed to automatically apply liquid egg and breadcrumbs, making it perfect for the production of croquettes, meatballs, flamenquines, cachopos, turnovers, fillets, meats, bites, and steaks, among others. In addition, its versatility allows it to operate with sugar and other sweet ingredients for coating confectionery or dessert products.

TECHNICAL CHARACTERISTICS:

- Manufactured in stainless steel.
- Reversing switch for automatic breadcrumb discharge (available on request).
- Fully detachable for easy cleaning.
- Variable speed control for different products.
- Tabletop machine (optional stand available).
- Option for additional special ramps and conveyor belts.
- Suitable for breading pieces with a maximum width of 280 mm.
- Built in accordance with CE standards.
- Detachable standard hoppers for adhesive (liquid coating) and breading.

MODEL: EAUT440
